

Pleash keep the benefits of the Indiana "No Call" law. I regained use of my phone and privacy for an entire year now and will not willingly go back to the circus that existed before the Indiana law stopped it. I don't want to switch to a cell phone instead of my normal house phone, but will do so if we go back to the invasion of privacy I had to endure before. I believe my own state government should be able to protect me from this if I willingly sign up for it.
